## 中国人常用的通讯工具

### Common Communication Tools of Chinese people

In China, there are mainly two kinds of communication tools—telephones and cell phones.

A telephone number usually has 7-8 digits. Forexample,2027816,82304156.Telephone numbers in different regions have different numbers of digits. Cellphone numbers, however, always have 11 digits regardless of region,as in 13576983311. Since a cellphone number has many digits,it read with pauses following the pattern“3-4-4”,such as 139-0107-8866.“1” is read as“yāo” in phone number.

Thank you
